Cutting edge printer software

Innovation since the dawn of the Internet

The JetAdvice product family consists of state-of-the-art printer software for optimizing printer fleets.

JetAdvice makes advanced Managed Print Services (MPS) easy and efficient with on-demand and in-depth device management.

Since the dawn of the Internet, we have navigated after these five beacons: Constant innovation, reliability, simplicity, security, and supreme quality.

We have more than 11 million devices on contract at companies all around the globe.
Our software brings value to the environment and to our customers by reducing CO_2 emissions, and saving time and money.

We make simple and intelligent printer fleet management that is easily available for everyone.

Passion to keep creating

The fuel that keeps the JetAdvice machine running smoothly is the passion to create reliable and efficient software solutions.

We have been doing it for more than 25 years - and we are still one of the frontrunners in the MPS industry.

Simplicity and efficiency go hand in hand

JetAdvice is a prominent player in the global MPS industry.

For many people it is a complex and technical world. As we see it, MPS does not need to be complicated. In fact, it should be the opposite.

That is why all our products are developed with usability and intuitiveness in mind.

We love simple and efficient solutions that are easy to install and easy to use.

This is our "family members"

Our product family consists of big brother JetAdvice Manager, the twins JetAdvice Premium and JetAdvice Hybrid, and the newest addition JetAdvice Connect.

Get to know them on the following pages.

Advanced printer fleet management made easy

JetAdvice Manager

JetAdvice Manager is the world's leading MPS solution.

It is advanced printer fleet management made easy.

JetAdvice Manager provides cloud-based and efficient printer fleet management with supply automation, integration, and detailed device data you can count on.

- Manage unlimited printer fleets and devices – easily
- Base decisions and recommendations on action-oriented quality data
- Reduce manual processes and errors

- Automate supply fulfillment and secure your supply business
- Experience the amazing ease of use
- Pay as you go - no startup fee

Want the best in class? Well, look no further

Additional advantages of JetAdvice Manager:
- Amazing ease of use and swift installation
- Top quality data
- Supports all devices from all vendors/brands
- In-time delivery of printer supplies
- Optimize customer supply stock

JetAdvice Connect

JetAdvice Connect takes printer supply fulfillment to a completely new level of simplicity and ease of use. The entire order and delivery process of printer supplies is now completely automated. From order to delivery. From start to finish.

The fully automated solution lets wholesalers and resellers turn disloyalty and random transactions into predictable and recurring income.

The orders will automatically keep flowing through the sales channel.

- Increased loyalty – orders stay in sales channel
- Tailor-made for wholesalers in the printer industry
- Reduces manual tasks and errors
- "Crystal ball effect" = better inventory management
- Private skin program – brand it as your own
- Completely multi vendor compatible

Total supply automation

Unlimited data delivery

JetAdvice Premium

The report hub JetAdvice Premium brings you on-demand and in-depth printer fleet data.

The reports are designed with the sole purpose of making it easy to save time and money for your organization or customer - by streamlining printer fleets.

The full picture of any printer fleet environment is right at your fingertips.

Reports range from free, initial assessments to in-depth analyses. All reports are based on reliable printer fleet data transformed into action-oriented and visually appealing information.

JetAdvice Premium is the informed basis you need to optimize printer fleets and create true value for any MPS customer.

- Optimize any printer fleet based on facts
- Action-oriented data for better decision making
- Reliable and detailed data set – best in class
- Customize reports to fit your needs
- Unlimited devices, reports, and assessments

JetAdvice Hybrid

JetAdvice Hybrid is the link between JetAdvice Manager and your back office.

It smoothly integrates real-time customer and device data with your system.

Customer and device data are strategic business assets. By using the unifying powers of JetAdvice Hybrid you will very easily have access to all the important data in your preferred location.

Anywhere, anytime.

- Easily access real-time customer and device data
- Integrated directly into your back office system
- Vast opportunities for integration, automation, and retrieval of data
- Data in the cloud
- Data at your preferred storage location

Smooth integration

Expect more from us

Introduction and training

If you like to try out some of the JetAdvice products or if you need training using them, we are ready to help.

Our products are very easy to use but perhaps you and your colleagues may want a start-up training session.

Whether you are in sales, IT, or back office, we will provide a customized training session that meets your daily needs and takes you to the next level!

Global language support

Working in your native language will increase your efficiency and let you take full advantage of the JetAdvice products.

The JetAdvice products support languages worldwide. We currently support more than 20 different languages around the globe.

If you need to work in a certain language currently not supported, we will add the language on request.

Custom development

If you need special modifications to our MPS solutions, our developers are always ready to assist.

Maybe you want us to add a functionality or to modify the existing UI or tools. We do workflow optimization, complete portal redesign, create special customer reports, etc.

Migration of data

Our expert migration service helps you move your data into the JetAdvice system. Efficiently and securely.

We move data from one or more sources with no risk of data loss. You minimize labor costs and the impact on your business operations. We provide migration plan and timetable as well as a thorough hand-off.

Your own private skin

We provide you with the possibility to brand the JetAdvice products as your own. From backend to frontend.

You can get the world's best MPS solution wrapped in your own private skin.

The logo, the look and feel, the colors - your customers will experience the entire solution as yours.
Integration

The real value of the JetAdvice data will appear when integrated with the systems you use daily, e.g. your Service or EPR systems.

We offer several ways to integrate JetAdvice data with other systems.

Data comes in many formats such as excel, csv, xml, and pdf. Exports can be handled manually or automated, "triggered reports" or scheduled reports, real time API, etc.
